TECHNOLOGY - A SUPERMARKET WITHOUT MERCHANDISE!

Here's a new way to shop! Tesco has installed billboards resembling supermarket aisles in the South Korean underground system. A QR code is printed under each item. Just use your mobile phone to scan the code, and your purchase will be delivered to the location you specify. Now that's a fast and easy way to get your shopping done while waiting for the train!

DESIGN - FROM COFFEE CAPSULES TO INCOMPARABLE RINGS

In the hands of Swiss artist Natalie Bino, these coffee capsules take on new shapes and purpose. Indeed, they are transformed into designer rings in a rainbow of colours which mirror the shades of the original packaging in a blend between an unconventional adaption and a recycler's dream. DESIGN - THE FOUR-POSTER BED OF THE 21ST CENTURY

Imagine yourself in a relaxing cocoon packed with entertainment, and you might dream yourself right into the Hi-can (high fidelity canopy). This modern take on the classical four-poster bed features motorized panels to block out the sun and ease your way to the land of dreams. Can't sleep - or don't want to? Dive into a world of entertainment as you explore films and games using the built-in, high-tech audio, visual, and multimedia system. The brainchild of Italian designer Edoardo Carlino, the Hi-can is, quite simply, a new way to get away from it all. www.hi-can.com

PHOTOGRAPHY - SNAPSHOTS OF LAUSANNE

Discover the many faces of Lausanne in the 140 snapshots contained in Lausanne Capitale Olympique (Lausanne: Olympic Capital). From vistas of stone to views of verdant greenery, photographer Régis Colombo brings the capital of Vaud to life, depicting her sports, festivals, culture, people and student life. The first official book about the town portrays a dynamic city, a place of constant change. Recently released (and available in bookshops for CHF 38), the work will also be provided to guests of Lausanne's government and to teens on their 18th birthday. An excellent gift.

DESIGN - AN IMPREGNABLE WALLET

Imagine carrying a tiny safe in your pocket. The smartMiniSafe (sMS), available for €275, has been designed to thwart the attempts of even the cleverest of thieves. If it is more than 5 metres away from your mobile phone, it starts to ring; if stolen, it sets off a 90-decibel alarm. And its metal shell will keep thieves from scanning your credit cards at a distance. www.smartminisafe.com
